WORK EXPERIENCE

To-do App
2023

Web app made with React

This web app was made with react, using Supabase services as Backend as a service to handle the persistency and the login, to handle magic links and google and Github login. This made strong the React knowledge.

Luis Fernando Castro
Maje Abogados
2023

Web page made with Angular

This is using Strapi on backend and Cloudflare to handle images. I built this custom website for this law firm and even knowing visually it is not the best, the project can demonstrate the Angular skill.
